SECTION 5: TERMS OF REFERENCE

A. Project Description

During 2024 – 2027, UNDP and UNICEF are jointly implementing the Project “Advancing Quality Education and Lifelong Learning Opportunities for All”, funded by the European Union. The overarching objective of the project is to contribute to human capital development in the Republic of Moldova, improving the quality and relevance of education and lifelong learning opportunities for all, for better matching the labour market demands. To achieve this, the Program will target the following specific objectives:

- Strengthen institutions and system for teacher and school leaders' professional development and support the implementation of education policies to enhance quality of teaching and learning (Development Strategy “Education 2030”).
- Improve equitable access for all children to quality education, promoting the development of an inclusive, digital, and resilient education system.
- Upgrade learning environments through renovation of selected school infrastructures and facilitate the development of the 21st century skills, contributing to better education opportunities for pupils/students and improved efficiency of the school network.

Under this joint Project, UNDP will support the professional development of teachers, promote life-long learning opportunities for adults, and be responsible for implementing interventions under the specific objective number 3 mentioned above, that aims at increasing quality, relevance, and efficiency of learning. More specifically, it will support Ministry of Education and Research in enhancing the learning environments and improving the teaching-learning conditions by setting up modern learning spaces, improvement of school infrastructure of 10 model/aspirational schools. It will also aim at redesigning existing STEEAM learning spaces to facilitate better learning, provision of modern technologies and teaching-learning resources and support the roadmaps for continuous development of digital learning space. The activities will ease the accessibility of students from remote areas to the model/ aspirational schools through access to transportation means and development of an integrated national system for school bus management. In addition, this component aims at designing and rolling-out a digital transformation & STEEAM model in upper-secondary education focusing on teachers' mentorship in using new educational technologies, adopting new pedagogical approaches, support the development of digital educational resources for science disciplines, and support the capacity of school managers to embark upon the process of e-transformation in education.

Model School Concept

The "Model School" concept was launched by the Ministry of Education and Research (MER) in February 2024 and involves the renovation and endowment of 35 general schools across the country. The concept aims to ensure equitable access to quality education for all students, but especially for students in rural areas, by creating a stimulating learning environment that would foster the development of cognitive and socio-emotional skills.

The "Model School" concept was formulated based on the problem of low results of students from the Republic of Moldova at international and national assessments. Every second student in the Republic of Moldova does not reach the minimum level of competence in the international PISA assessment. Although, since the first participation in that assessment, the average score has increased, the last PISA 2022 edition has seen the results going down with the share of students who did not reach the minimum level of competence reached up to 55.8% in mathematics, 48.4% in reading and 48.5% in science.¹

The monitoring measures of the gymnasium graduation exams, carried out by the MER and NACE² in over 180 institutions in 8 districts this year, have attested a decrease in the exam passing rate, in some districts the passing rate dropped by 36%, from 100% to 64%.

Organizational Development

The managers of the Model Schools are responsible for the development process of the institutions they lead and will direct the enactment of the mission they undertake as a Model School. Ensuring a stimulating learning

¹ [pisa_2022_raport_mda.pdf](#)

² National Agency for Curriculum and Evaluation

environment for all students, including students from rural areas who will be transferred to these schools, is the central mission of the Model Schools. All processes of infrastructure modernization, organizational development and teacher training will be aligned with the latter. The managers of the 10 model schools participating in the project will be supported in developing the skills necessary to lead and synchronize all these processes. The school principal shall become responsible for placing learning at the heart of the school's mission and translating the vision into strategy so that the organization's actions are consistent with its vision, goals and values. He or she will be supported for organizing work and administrative processes to facilitate professional dialogue, collaboration and knowledge sharing, all of which are essential for promoting change and innovation.

Recent UNICEF studies confirm the need to invest in the professional development of managers in the Republic of Moldova. Evidence suggests that in many cases they face difficulties in leading organizational development efforts, with most continuing to focus on traditional administrative and management tasks (UNICEF, 2019).

The "Advancing Quality Education and Lifelong Learning Opportunities for All" program will contribute to the Moldova National Development Strategy 2023 by modernizing education, improving infrastructure, and promoting inclusive learning environments. By transforming 10 schools into Model Schools with student centered design renovations, the program will enhance learning outcomes and equip students with 21st-century skills. It also supports school leadership through organizational development, ensuring effective change management. This aligns with the UN Strategic Plan Outcome 1 and UNDP CPD Outcome 2, focusing on human rights-based, gender-responsive services for all, especially the underserved. The program advances SDG 4 targets by providing free, quality education, improving skills for financial success, and upgrading inclusive schools.

B. Objectives of the assignment
